EXPERIENCE

Full Stack Developer
Webledger

📅 Feb 2024 – Present   📍 Surat, India

- Developed the design and development of a streamlined **GST filing process**, automating **data flow** from **frontend to backend**. Ensured **100% regulatory compliance** and significantly improved the **user experience**.
- Facilitated successful deployment of **SSO** solutions across **Three applications**, which resulted in lower support tickets related to password resets—reducing manual intervention efforts by approximately **200 hours** monthly due to simplified access controls.
- Designed high-performance **RESTful APIs** with **AdonisJS**, enabling smooth frontend-backend interaction, while enhancing the overall system **scalability** and **data reliability**.

Full Stack Developer
Divam Technologies

📅 Aug 2023 – Jan 2024   📍 Remote

- Spearheaded the development of high-performance **Express and React** applications, integrating scalable **APIs** to deliver seamless user experiences and boosting functionality by **25%**.
- Executed strategic **SEO** optimizations, boosting web traffic by **40%** through enhanced code performance, page speed, and best practices in UI design.
- Deployed projects on **AWS**, leveraging scalable infrastructure to ensure high availability, optimize performance, and maintain **99.9%** uptime.

PROJECTS

AI Course Craft   Live   Github
AdonisJS | VueJS | Typescript | Gemini | Clerk | Bootstrap

📅 Present

- Designed a robust Full Stack AI Course Generator employing technologies such as AdonisJS and Vue.js; achieved the ability to create **500+ personalized courses monthly** utilizing seamless integrations via the Gemini API.
- Enabled secure authentication for **500+ users with Clerk**, supporting **5 user** roles and ensuring full data protection compliance.
- Boosted database performance and reliability by integrating **Drizzle ORM**, streamlining schema management, enabling real-time updates, and improving query efficiency by **30%**.

Crypto-Tracker   Live   Github
HTML | CSS | JavaScript | ReactJS | Firebase

📅 December 2023 – January 2024

- Engineered a fully **responsive website** utilizing React JS and Material UI, incorporating graphical price trends, thereby improving user session duration by **40%** within the first quarter.
- Developed a personalized watchlist feature used by over **50** users, enabling real-time tracking and updates for cryptocurrencies, with **99%** data persistence and enhanced user engagement.
- Leveraged **Firebase authentication** for secure user login and data storage, achieving seamless accessibility and **99%** reliability across all devices.

EDUCATION

B. Tech In Data Science
R. C. Patel Institute of Technology, Shirpur

📅 Feb 2021 – June 2024   **CGPA : 8.02**

Class XII In HSC
M. K. Shinde Jr. College, Kusumba

📅 June 2019 – May 2020   **74.00%**

Class X In SSC
R. G. V. School , Gotane

📅 June 2018   **80.60%**

SKILLS

NodeJS   ExpressJS   Ionic   AdonisJS   ReactJS   VueJS   JavaScript   SQL   TypeScript   Python   Django   Redux   Postman   Redis   AWS(S3)   OOPS   DSA   CSS   HTML   Bootstrap   Git-Github   REST-APIS

ACHIEVEMENTS

- Winner Of Coupon Redemption Predict-A-Thon 2022 (Hackathon) By **MachineHack**
- Solved Over **300+** Coding Questions On Different Coding Websites
- 4 Star in Python at **HackerRank.**

CODING PROFILES

- **LeetCode**
- **GFG**
- **Coding Ninjas**

CERTIFICATION

- Introduction To HTML, CSS, JavaScript, **Coursera**
- Introduction To Front-End Development, **Simplilearn**
- Python For Data Science, **IBM**
